## JANUARY 2026 NEWSLETTER

### THE SEVEN WORK PACKAGES

- Completion of workshops for **Work Package 4** in early 2026 to define requirements for an online resource to address unmet informational needs of people impacted by prostate cancer using PCOR-ANZ PROMs, enabling commencement of the build and testing phases.
- Planning for **Work Package 5**, including the design of a PRM awareness campaign.
- Vendor appointment for **Work Package 6** and commencement of sector mapping to identify opportunities for data automation.

We are excited to keep you informed as they progress.

### HAPPY NEW YEAR & 2026 PRIORITIES

From everyone at the Pan Cancer Initiative, we hope you enjoyed a happy holiday period and some well-deserved rest.

2026 is shaping up to be a particularly busy and important year for the Pan Cancer Initiative with several work packages nearing completion, including:

- **Work Package 1:** With the Delphi consensus process now complete, we are preparing to broadly disseminate the Core Outcome Set (COS). In 2026 we will also extend this work to enable the sector to translate the COS into local implementation plans.
- **Work Package 2:** The ePRMs platform will be a discussion topic at the upcoming workshop with CQRs.

The first months of 2026 will also see significant progress across other work packages, including:

- Launch of the **Work Package 3** Request for Proposal, focused on establishing a framework to understand and enable the flow and benchmarking of COS data.

### CQR WORKSHOP

In late February, we will be holding a face-to-face workshop in Melbourne with representatives from each of the 10 Pan Cancer Initiative Consortium CQRs. We look forward to collaborating in person, and identifying the specific work packages CQRs can participate in and may benefit from.

We would like your feedback. Scan the QR code to let us know what you'd like to read about in future newsletters.

JANUARY 2026 NEWSLETTER

## JOIN US FOR THE PAN CANCER INITIATIVE VIRTUAL UPDATE - 3PM ON 24 FEBRUARY

We are excited to invite you to our next Quarterly Virtual Update on the Pan Cancer Initiative, scheduled for 3pm AEDT on Tuesday 24 February. These sessions are designed to keep you informed, provide a platform for questions, and share key developments from across the initiative.

The session will explore:

- An update on progress across the work packages
- Why we developed a Core Outcome Set
- An update on Work Package 4: A Public Feedback Mechanism for Prostate Cancer Patients
- A dedicated Q&A and discussion session to answer questions and get your input

Hear directly from the team leading the work and engage with other key stakeholders. Scan the QR code to register and secure your place.

## WORK PACKAGE 6 REQUEST FOR PROPOSAL

The Work Package 6 (Data Automation) RFP process is continuing with suppliers shortlisted and interviews held. We are expecting the successful supplier to be selected soon and for work to begin on the feasibility assessment stage.
