The Australian Real World Cancer Evidence Network (Pan Cancer Initiative)

A co-funded partnership between Movember, Cancer Australia & the Department of Health, Disability and Ageing

Work Package 1 of the Pan Cancer Initiative aims to identify generic patient-reported outcome and experience measures that should be collected across all cancer types. Sector and lived experience engagement has been a crucial part of the discovery phase.

Lived Experience Engagement

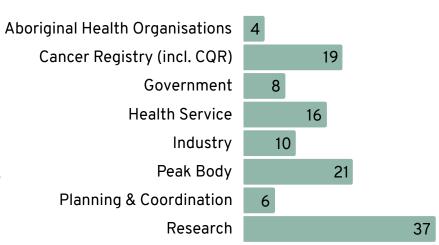

97 people with lived experience told us what was most important to them. Participants represented:

Priority PROs	Priority PREs
 Physical health: Pain, nausea, sleep, and fatigue Mental health & wellbeing: Anxiety, depression, emotional resilience, and fear; culturally relevant holistic and spiritual dimensions Socio-economic dimensions: Financial toxicity, social support 	 Information provision: Both too much and too little was noted, suggesting a domain around information adequacy or overload Experiential dimensions: Feeling respect and listened to by staff, and the quality of interactions with healthcare professionals Experiential dimensions: Information provision and use, for treatment, and management of feedback

Sector Engagement

representing the cancer sector identified the most relevant and critical PRO and PRE domains in cancer care.

Priority PROs		Priority PREs
 Quality of life – global Psychological wellbeing Physical health & functioning Social functioning Financial toxicity Sexual function & wellbeing 	 Pain Fatigue Cognitive Other symptoms & side effects Fear 	 Information Communication Partnership Access Coordination & continuity of care
	Activities of daily living	Cultural safetySupportPerson-centred care

Next Steps

Achieve consensus on a core set of generic patient-reported outcomes and experience measures through a Delphi process.
